Explanations:

¹⁾ P1, P2 at the ordinal number identifies the Laboratory location carrying out the test.

Asterisk * at the ordinal number identifies the tests, which the Laboratory is qualified to carry out outside the permanent laboratory premises.

²⁾ If the document identifying the test procedure is dated, only these specific procedures are used. If the document identifying the test procedure is not dated, the latest edition of the specified procedure is used (including any changes).

³⁾ absorption solutions, condensates

⁴⁾ filters, tubes with a solid sorbent

⁵⁾ acid extract for the purposes of the Reg. 13/1994 Coll.

⁶⁾ solid materials: debris, building and metallic materials, fertilizers, feedstuffs, solid fuels, chemical raw materials, soils, sludge, sediments, waste, textiles

⁷⁾ aqueous extracts and extracts within the scope of Regulation No. 294/2005 Coll.,

⁸⁾ extracts in saline solutions for agricultural purposes

⁹⁾ spaces: smears and prints from surfaces, equipment and packaging, air samples (fall-outs, cups from an aeroscope)

* Asterisk at the test procedure name indicates that the laboratory determination of an analyte in the sample is subcontracted to an external service provider.

Water: all types of water except bottled water and purified water according to Czech Pharmacopoeia, aqueous solutions

Emission: Waste gas containing pollutants released in a controlled manner or leaking into atmosphere from sources of pollution

Air: workplace, outdoor, indoor air

Pressure gas: pressure gas in air handling ducts and piping, gas in pressure cylinders, biogas
